

11

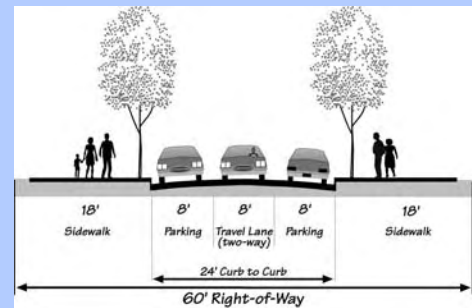

NE 53rd Ave

Thompson to Halsey

Existing Conditions

Neighborhood:	Rose City
Segment length:	0.37 miles
Avg Daily Traffic Volume:	400
Avg Traffic Speed:	21- 23 mph
Curb to Curb Street Width:	24 ft
Major Crossing:	NE Halsey St

Existing Bikeway Character

One of the best of the overall route, this flat segment has low traffic volumes and speeds as it moves through the Rose City neighborhood.

The street's very narrow width (24 ft), with parking on both sides, helps control both speeds and volumes. Safe, convenient crossings of Halsey St are aided by an existing traffic signal.

Key Bikeway Design Issues

- None!

*NE 53rd Ave between Thompson and Halsey:
The narrow width of the street provides natural
traffic calming. The existing low traffic
volumes and speeds are very favorable for
bicycling.*

Recommended Improvements

- **NE 53rd/ Halsey Bike Box**
Improve safety at intersection.
- **'Sharrow' pavement markings**
Help bicyclists stay on route and increases driver awareness of the presence of bicycles
- **Destination signage**
Helps bicyclists make connections to the rest of the bicycle network.
- **Reduce speed limit to 20 mph.**
