

PORTLAND BUREAU OF TRANSPORTATION

Approved Non-slip Access Cover/Lid Surfaces

Access lids shall be constructed of steel, aluminum, concrete, or polymer with an approved non-slip surface having a static coefficient of friction between 0.60 and 1.00 as determined by ASTM Designation C 1028-89. Access lids on inclines greater than 4% shall have a coefficient of friction between 0.80 and 1.00. Lids with openings greater than 0.5 inches (in the direction of travel) are not allowed in the pedestrian through zone (as defined in the Portland Pedestrian Design Guide).

Owners are responsible to maintain the non-slip characteristics of the access door over its life in the sidewalk area. Additional products may be approved by the City Engineer on an "approved equal" basis

*TPZ – product allowed to be used in Through Pedestrian Zone
