

Tell Us What You Think

This is an opportunity for all of the East Portland communities to get updated and provide critical input on your thoughts and opinions about the development of the Division-Midway Neighborhood Street Plan. Feedback received at the event will help guide and inform the final Division-Midway Neighborhood Street Plan that will be recommend to the City Council this summer.

Four Ways to Provide Input

The four (4) ways to provide your input today are;

1. Take a colored comments card and provide us with a written comment, opinion, support, or concern. We welcome you to answer the questions listed below
2. Provide brief comments on a “yellow sticky note” directly onto the maps or boards.
3. Funding Partnership
4. Vote with a Dot (Green, Yellow, or Red) for individual connections by placing it on the 3-tier prioritization table. (large board with blue boxes and map locations)
5. Vote with ONE dot on the overall Plan at the Dot Ballot Board.

Comments & Questions

Question 1: Would any of these connections benefit you, your family, your community? Which ones? Why?

Question 2: Do you agree and support the connections we prioritized? If not, then why? If so (yes), why?

Question 3: Are we missing something important? If so, what? Where? Why?

Funding Partnership

The goal of this exercise is to find out if there is property owner support to help fund improvements on you block IF the City would also provide funding (matching, or partial reimbursements, etc.).

Please place a check-mark in the column next to the individual connection you would potentially help pay for. This is not binding. Please include your contact information on the comment card so that we can follow-up with you later.

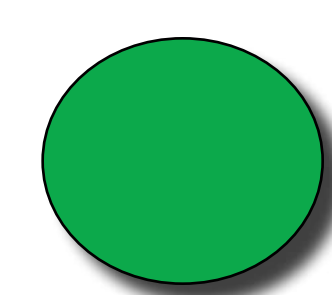

Comments on Individual Connections

The goal of the green-yellow-red dot exercise is to get feedback on individual connections and how to prioritize them before a final recommendation is made. This provides you, the public, an opportunity to review and weigh in on individual connections and the proposed prioritization, which is based on previous community input and technical evaluation using the project criteria.

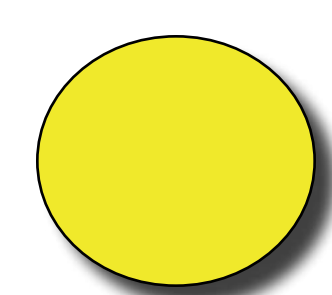

You will receive a set of dots this evening. The directions below explain how you can use these dots. Please return any un-used dots you have left at the welcome table.

Vote with Green, Yellow and Red Dots

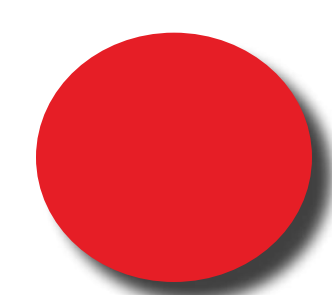

These dots are intended for voting on individual connections in the list of Tier 1-3 Priority Connections in Existing Right-of-Way. You can vote on multiple connections. However, please do not place more than one dot on any one connection.

Green Dots = Go. Vote with a green dot if you support the connection and think it should be a priority.

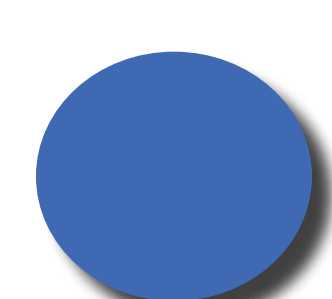

Yellow Dots = Caution or concern, but still support. Vote with a yellow dot if you have a concern about a connection, like a detail in the proposal you think needs to be changed, further addressed or something is missing. You may also place yellow dots on the maps where a connection is missing that you think is important. Please share more information about why.

Red Dots = Stop. Vote with a red dot if you do not support a connection as a priority, and think it should be a lower priority. Please share more information about why.

Brief Comments about Why on Sticky Notes

We would like to learn why you voted green, yellow or red. We encourage you to write a brief comment telling us why on a sticky note and place it along the edge of the board. Please include the connection Project #ID on the note so we can match it correctly. If you have a long comment, please write it on a comment card.

Vote with One Blue Dot

The goal of the blue dot exercise is to gauge support for the overall proposed plan. One dot is provided per participant.

Please place your dot in one of the three sections on the last board.

- I support the overall proposed plan
- I support the overall proposed plan with minor amendments. (Please share more on a sticky note.)
- I do not support the overall proposed plan. (Please share more on a sticky note.)

Brief Comments about Why on Sticky Notes

We would like to learn why you chose your vote. We encourage you to write a brief comment telling us why on a sticky note and place it in the same section as your dot on the board.

Thank you for your time and feedback!
