CONSTRUCTION PRODUCTS LIST
BUREAU OF ENVIRONMENTAL SERVICES - BUREAU OF TRANSPORTATION - PORTLAND WATER BUREAU

The **"CONSTRUCTION PRODUCTS LIST" (CPL)** is a list of products which have been evaluated and/or specifically used by the **City of Portland Bureau of Environmental Services, Bureau of Transportation, and the Portland Water Bureau.** (Click Blue Text)

The **"QUALIFIED PRODUCTS LIST" (QPL)** is a comprehensive list of products which have been evaluated and/or used by the **OREGON DEPARTMENT OF TRANSPORTATION (ODOT).** (Click Blue Text)

The CPL contains products specific to the City of Portland. The CPL and QPL are not identical. If the product you wish to use is **NOT listed on the CPL but IS listed on the ODOT QPL, you must submit the QPL information to the Engineer for product approval.**

The "CONSTRUCTION PRODUCTS LIST" is made up of three types of lists:

1. The **QUALIFIED LIST – "Q"** is for products that have been reviewed and found to be suitable for use in a specific category. Job control testing may still be necessary. Consult the ODOT "Nonfield-Tested Materials Acceptance Guide," the ODOT "Field-Tested Materials Acceptance Guide," and the Project Specifications.
2. The **APPROVED LIST – "A"** is for commercially available products having a low consequence of failure. These products are only usable for appropriate applications. May Require a Field Inspection Report which states existence on the Approved List and recognition of the product. No additional sampling or testing is needed.
3. The **REJECTED LIST – "R"** lists products not allowed for any use.

The use of all products is restricted to the category in which they are listed. Products should be used and installed as the manufacturer

<u>Description</u>	<u>Page #</u>

The **CPL Product Review Submittal Form** can be downloaded here: <http://www.portlandonline.com/transportation/index.cfm?c=40032> then click on "Construction Documents".

Although the products listed may be approved for use, they are not exempt from City Purchasing Rules, practices and guidelines, or manufacturer's warranties or guarantees.

Send your CPL Product Review Form, test results, product data sheets and brochures to:

Traffic Control Devices Notice (4-7-2011)

The American Association of State Highway and Transportation Officials (AASHTO) recently published the *Manual for Assessing Safety Hardware* (MASH). MASH is an update to and supersedes NCHRP Report 350.

Requirements in Section 1408 of SAFETEA-LU stated that "The Secretary, in cooperation with the Association [i.e., AASHTO], shall publish updated guidance regarding the conditions under which States, when choosing to improve or replace highway features on the NHS, should improve or replace such features ... ". The AASHTO/FHWA Implementation Plan was developed to satisfy that requirement.

Category 1: Plastic Tubular Markers, Plastic Barrels.

Category 2: Portable Sign Supports, Tripod Mounted AFAD's, Type 3 Barricades, etc.

Category 3: Impact Attenuators, Guardrail, etc.

Category 4: Trailer Mounted Sequential Arrows, Trailer Mounted Message Boards, Trailer Mounted AFAD's, Trailer Mounted Flagger Station Lighting etc.

It is the responsibility of the Contractor to ensure they use a product that complies with the appropriate requirements.

POTABLE WATER SYSTEM MATERIALS

Water Bureau Materials Manual

As stated in City of Portland Standard Construction Specifications Section 00160.06; [A Materials List](#) of commercially available products that Portland Water Bureau (PWB) has evaluated and found suitable for specified use in construction is located on the PWB website shown below.

<http://www.portlandonline.com/water/index.cfm?c=29862>

For additional details concerning the PWB Materials Manual, contact the PWB Owner's Representative. The current version of the Materials List at the time of Bid Opening is the version in effect for the Project. A conditionally qualified product, Special Application Only product, or a product qualified for inclusion in a later edition of the Materials List may be used only if the Owner's Representative finds the product acceptable for use on the Project. Use of the listed products shall be restricted to the category of use for which they are listed. Unless otherwise specified, the Contractor shall install all products as recommended by the manufacturer. The Contractor shall replace qualified products not conforming to Specifications or not properly handled or installed at Contractor expense.

**CONSTRUCTION PRODUCTS LIST
BUREAU OF ENVIRONMENTAL SERVICES**

As stated in the City of Portland Standard Construction Specifications Section 00160.05, the Construction Products List (CPL) is a list of manufactured products available on the market (shelf items) that BES has evaluated and found suitable for specified use in construction.

The BES CPL is available at the following link:

<https://www.portlandoregon.gov/bes/71214>

The current version of the CPL at the time of Bid Opening is the version in effect for the Project.

The Engineer may approve for use a conditionally qualified product, or a product qualified for inclusion in a later edition of the CPL, if the Engineer finds the product acceptable for use on the Project. Use of listed products shall be restricted to the category of use for which they are listed.

The Contractor shall install all products as recommended by the manufacturer. The Contractor shall replace qualified products not conforming to Specifications or not properly handled or installed at the Contractor's expense.

Choosing a product from the CPL does not alleviate the Contractor from its responsibility to follow the requirements of the Contract. Use of all other products and 'or approved equal' products not included on the CPL requires a standard construction submittal for review and approval.
