

# Safety Cameras on High Crash Corridors

Coming soon on SE Division Street and SE 122<sup>nd</sup> Avenue

**What Are Safety Cameras?** Safety Cameras are proven safety tools that can reduce dangerous speeding in your neighborhood and save lives. They are mounted along High Crash Corridors and when people driving past them exceed the posted speed limit, they capture photos and video for review by Portland Police.

**Why these streets?** SE Division and SE 122<sup>nd</sup> are both High Crash Corridors. People walking along or crossing these streets on foot are twice as likely to be struck by a car than on the average city street. Pedestrians struck by speeding drivers on these roads are unlikely to survive.

**Will these cameras issue speeding tickets?** Our goal is to reduce speeding and save lives. The cameras will issue warnings for the first 30 days. Thereafter, people can avoid citations by travelling the posted speed limit. Any money received from the tickets pays for the program and safety improvements on the corridor.

## DEATH DUE TO SPEED

**What is Vision Zero?** The City of Portland has joined cities around the country in embracing Vision Zero – the notion that the death of even one person on our roads is one too many. Vision Zero prevents traffic deaths through smart policy and system design. Learn more by visiting [www.VisionZeroPortland.com/SafetyCameras](http://www.VisionZeroPortland.com/SafetyCameras)

The Portland Bureau of Transportation fully complies with Title VI of the Civil Rights Act of 1964 the ADA Title II and related statutes and regulations in all programs and activities.
