

City of Portland
Pedestrian Advisory Committee

April 17, 2018
6:00 – 8:00 PM
City Hall, Lovejoy Room

6:00-6:45: Central City in Motion (45 min); *Gabe Graff, PBOT Project Manager*

Portland's Central City is growing rapidly. By 2035, the Central City's population is projected to triple and the number of jobs in the area will increase by 40 percent. Central City in Motion (CCIM) is PBOT's currently underway planning effort to identify and prioritize strategic multi-modal improvements to create a smart, 21st century transportation system in the Central City to help manage this increased demand in our transportation system. The project will identify, prioritize, and fund transportation improvements in the Central City to improve mobility and safety for all modes. Sample projects that the plan may identify, prioritize, and fund include:

- Safer intersections
- Improved pedestrian connections
- Dedicated transit lanes
- Separated bike routes
- Clear demarcation of street space for freight, transit and bicycles

Additional information about CCIM is available on the [project website](#).

Key questions/issues for the PAC: General briefing on the project in anticipation of upcoming public surveys which will seek input on needed transportation improvements and priorities in the Center City.

6:45-7:30: Regional Transportation Plan (45 min); *Mark Lear, PBOT Legislative Resources Group*

Metro is in the final few months of developing the region's long-range transportation plan for 2018-2040. As the metropolitan planning organization for the Portland metropolitan area, Metro is authorized by Congress and the State of Oregon to coordinate and plan investments in the transportation system for Clackamas, Multnomah and Washington counties. Every four years, Metro is required to update the Regional Transportation Plan (RTP), a guide for future investments in the region's transportation system. Additional information about RTP update is available on Metro's [website](#).

The purpose of this presentation is to provide an overview of the function of the RTP (what is it, how does it impact PBOT's work?). We will specifically focus on pedestrian impacts.

Key questions/issues for the PAC: The "ask" to the Committee is to get involved in this RTP process - this could include a letter from the committee.

7:30-8:00: Hot Topics/Announcements/Committee Business

- Google docs walkthrough
- Gideon Overcrossing Fact Sheet
- Neighborhood involvement
- Public comment/questions for committee
- Action items/next meeting
