

Portland Traffic & Transportation
Class Project

So you've identified a problem in the transportation world that you'd like to address. Great!

Now what?

Week 2

Generally speaking, you get a lot further when you come to the table with a well-thought-out solution to a problem than if you just show up with a complaint about it. So the next step is to come up with a way (or several ways) that your problem could be fixed or improved. If it were up to you, how would you improve the issue? What do you think a good solution would be?

Try to be as specific as you can. There's a good chance that you'll do some research or talk to some knowledgeable expert in the field sometime in the next couple of weeks and will need to refine your idea. That's fine. The important thing is to a.) do the best you can with the information you have and b.) keep collecting more information.

Your response can be a single sentence or up to a page in length. Please either bring a hard copy to class next week (Oct. 11th) or email it to the class moderators. Emailed assignments should be sent by noon on class day to give the moderators time to check in your assignment.
