**NW FLANDERS | ROUTE OVERVIEW**

**PROJECT MAP**

**Full Closure at NW 17th & 24th**
An intersection safety realignment, closes NW 24th to automobile traffic at NW Westover, eliminating a confusing intersection and protecting the neighborhood from cut-through traffic.

A pedestrian improvement across NW 17th allows people to access the new bike and pedestrian bridge while limiting cut-through vehicle volumes.

A freight friendly cul-de-sac allows for loading and unloading.

**Flanders Crossing**
A new bicycle and pedestrian bridge across I-405 provides a safe and comfortable connection across the interstate below.

This bridge will be seismically sound and increase the resiliency of the surrounding neighborhoods in the event of a major seismic event.

**North Park Block Extension**
Extending the North Park Blocks across NW Flanders enhances a beloved public space while also limiting vehicle volumes on the greenway.

Bicycle and pedestrian access continues through the park at this location.

**One Way Contra Flow Bike Lane**
A series of one-way contra flow bike lanes allows for local vehicle access while limiting cut-through traffic along the corridor.

Contra flow bike lanes allow for a comfortable and direct connection for people biking.
