Portland Water Bureau to conduct underground survey work on SW Nevada Street week of April 29, 2013

PORTLAND, OR -- Starting Monday, April 29 through Friday, May 3, 2013, a Portland Water Bureau crew will conduct exploratory underground survey work (potholing) that will affect both lanes on SW Nevada Street, between SW Macadam Boulevard and SW Virginia Street. The work will take place between the hours of 8:00 am to 5:00 pm.

Flaggers will allow local access only for residents and deliveries during the survey work. Some street parking will be restricted during work hours. This work must be conducted to determine the exact locations of utility conduits under the pavement to ensure they do not conflict with a new water pipeline's alignment.

The survey work is part of the first phase of the city's project to construct a new drinking water pump station in Willamette Park, scheduled to begin in 2014.
