

## Choosing a Certified Irrigation Contractor

Summer landscape irrigation is an important part of creating vibrant outdoor spaces. Take time at the beginning of the summer and periodically throughout the season to turn on your irrigation system and watch for any potential problems. In-ground automatic sprinkler systems require regular maintenance and schedule adjustments to perform well and water-efficiently. Hiring a knowledgeable contractor can ensure your system continues to perform while maintaining a healthy landscape for years to come.

The U.S. Environmental Protection Agency (EPA) WaterSense Program labels certification programs for landscape irrigation professionals that advance water-efficient irrigation techniques and practices. An irrigation professional certified by a WaterSense labeled program can design, install, maintain, or audit your irrigation system to ensure it uses the right amount of water to maintain a healthy landscape while minimizing waste. Get more information at: [www.epa.gov/watersense](http://www.epa.gov/watersense)

Name	Certification Type(s)	Certified By	Company Name	For Hire	Phone	Email	Customer Type(s)
